

KUBO SIDE TABLE

DESCRIPTION

A monumental presence in a classic-inspired or eclectic interior decor, this side table is characterized by a well-balanced interaction of continuous lines and geometric shapes. Entirely handcrafted of bronze-plated brass, the austere square top rests on a base constructed from a continuous line that is shaped into a repeated motif reminiscent of the ancient Greek meander. A brass sphere at the juncture of each corner locks the open profile lending visual interest to this stunning piece designed by Luca Radice.
